POSITION: Maintenance Management Production Superintendent, (ILO Production Controller, GS-09), DAFSC 2R090, POSNR 0962759, 154<sup>th</sup> Maintenance Operations Flight, C50RFNOF, Hawaii Air National Guard, Hawaii. (To establish a List of Eligible)

TYPE OF APPOINTMENT: Full-Time Military Duty (Title 32, USC 502(f)) – Five (5) year tour length (**See NOTES TO APPLICANTS**)

LOCATION: JBPHH, HI

CLOSING DATE: 30 October 2015

RECRUITMENT AREA:

1<sup>ST</sup> Area of Consideration: Present enlisted members TSgt (E6) to MSgt (E7) (dependent upon controlled grade availability) of the US Armed Forces within the State of Hawaii with AFSC 2R1X1. Applicant must be eligible to become HIANG member.

2<sup>ND</sup> Area of Consideration: Present enlisted members TSgt (E6) to MSgt (E7) (dependent upon controlled grade availability) US Armed Forces Nationwide AFSC 2R1X1. Applicant must be eligible to become HIANG member.

SUMMARY OF DUTIES: Performs maintenance management functions. Supervises, directs, and controls collection, auditing, evaluation, and analysis of MIS data to include auditing source data for accuracy, timeliness, and compliance with directives. Supervises analysis of deficiencies in areas such as equipment performance, materiel consumption, scheduling, management, and resources; their impact on the maintenance mission; and results of corrective actions. Reviews and approves written reports and special studies for presentation to senior leaders. Coordinates with appropriate information management/processing centers to ensure automated systems capability and compatibility with customer requirements are met. Forwards requirements and enhancements to higher headquarters for approval. Plans, organizes, directs and controls scheduling of aerospace vehicle maintenance and utilization requirements. Develops plans and establishes production schedules to meet mission requirements. Determines maintenance capabilities to aid in developing operational schedules. Prepares weekly, monthly, and quarterly utilization schedules for known maintenance and operational mission and training requirements. Coordinates with base activities to ensure support is available to meet schedules. Supervises development of generation flow plans for unit emergency war order and wartime taskings within unit Designated Operational Capability (DOC) statement.

## JOB VACANCY ANNOUNCEMENT FY15-069 AGR-AIR

Supervises review, evaluation, and filing of documented information for planning and scheduling maintenance actions. Manages the aircraft configuration, TCTO, special inspection, and time change program and their related automated subsystems. Manages Maintenance Operations Center (MOC). Monitors and coordinates sortie production, maintenance production, and execution of the flying and maintenance schedules. Maintains visibility of fleet health indicators. Establishes priorities for competing, limited maintenance resources, based on daily flying schedule and maintenance priorities. Ensures aircraft status is properly reported and maintained. Determines long-range fleet health maintenance priorities. Provides supply liaison and engine management support for flight line and back shop maintenance requirements. Schedules and monitors workload requirements. Resolves problems and interprets technical publications for inspecting, maintaining, and modifying aircraft and support equipment. Ensures unit meets mobility requirements. Ensures the appropriate maintenance and operations commanders are advised of maintenance capabilities, limiting production factors, and adherence to maintenance schedules.
