Commander – Notes

The unit CDR will—

- Verify the promotion eligibility roster.
- Unit CDR will validate the IPPS – **A board preferences and recommend or not recommend promotion board consideration for all eligible Service members within their commands.**
- **The SM's leader (generally the first-line leader) will review IPPS – A board preferences with the SM to verify information and update entries on the form. They will obtain the SM's choice to accept or decline consideration and, if accepting consideration, the SM's choice of one or more of the options provided.**
- The CDR may complete this action in the HR system of record when the SM is not available.
- Service members who are not available to complete their preferences in the HR system of record because of unauthorized absence, unsatisfactory participation, or AWOL will not be contacted. If they do not return to duty before the cutoff date for submission of documents announced by the AG (MPMO) or DARNG in the promotion board announcement, they will not be considered by that board and are not eligible for standby consideration.
