ADDENDUM NO. 1
BOMB SQUAD VEHICLES, STATE OF HAWAII,
DEPARTMENT OF DEFENSE,
OFFICE OF HOMELAND SECURITY,
JOB NO. CA-1810

The items listed hereinafter are hereby made a part of the contract for the above mentioned project and shall govern the work taking precedence over previously issued contract documents governing the items mentioned. Receipt of this addendum is to be acknowledged on page OF-5 of the Offer Form.

The following are questions submitted prior to the due date of May 24, 2018.

1. A body builder and model is not listed for quality reference for the conversion, appears to be a LDV spec. The Hawaii auto fleet dealers quoting this as prime may need know for source quotes.

A. We can not specify the make or model of the vehicle; the vehicle is an express commercial cutaway 4500 van 159", 6.0L/364 CID Gas V8, 6 speed automatic, interior, medium pewter, exterior, summit white.

2. The OEM vehicle front seats are not specified i.e. bucket, and space limitations. Trying to determine if using a Havis Inc communications console will fit. All depends on vehicle quoted. See following links as example of what we are asking / suggesting.

http://www.havis.com/images/resized/C-VS-1800-SAV_A_11-05ZZ-W_600.JPG

http://www.havis.com/products/CON_VS_18TMS_55DG_HC_ESRS_97_18-33255-79.html

A. Bucket seats with console; using the recommendation Havis Inc communication console should be able to be installed by the manufacturer.

3. Page 4 last item listed "1 LED Strip Light". Request / Recommend Whelen model PSC0CD CR as or equal.

A. Accept recommendation to use Whelen model PSC0CD CR as or equal.

4. Page 6 in DC Electrical System Reference to Orion 6" LED white, and Orion 6" LED white / red. Request / Recommend Whelen model 60C0EJCS 6" round compartment light white or equal. Request / Recommend Whelen model 60CREGCS 6" round compartment light red / white or equal.

A. Accept recommendation for the Whelen model 60CREGCS 6" round compartment light red / white or equal.

5. Page 7 in Emergency Lighting / Sirens. The 295SLSA5 siren amplifier switch control is a retired model number. Recommend replace with 295SLSA6 if you wish a self contained unit as current model. The TIR3 series still made. That stated may want to consider the ION series for current fitment vehicles.

A. Concur with the recommendation to replace 295SLSA5 with 295SLSA6 siren amplifier switch control. No other changes required - the remainder as stated as it is written under the emergency lighting/sirens.

6. Does the agency currently have a Bomb Squad vehicle and if so who did the up fit?

A. We are not aware if the Counties currently have this type of vehicle or if they do, where they are from.

Arthur J. Logan
Major General
