Dear Governor Ariyoshi:

*Fiscal Year 1983 was filled with events challenging the readiness of the department to perform its mission. In successfully meeting each challenge, the members of the Hawaii National Guard and State Civil Defense have demonstrated their readiness to carry out the department's mission.*

*The most challenging event was Hurricane Iwa whose destructive winds and ocean surges caused an estimated \$234 million in damages to private and public property on Kauai and Oahu. State Civil Defense coordinated both State and Federal resources to support county level requirements. State Civil Defense assisted the Federal Emergency Management Agency (FEMA) in identifying, justifying and qualifying more than 1,000 State and County disaster projects for Federal public assistance funds. Planning guidance and plans were published or updated to improve the Civil Defense system's capability to respond and ameliorate the effects of future disasters, natural or technological.*

*The Hawaii Army National Guard continued its march toward improvements in its readiness to meet its Federal mission. Weekend drills, held once each month, were devoted to developing and improving individual and unit skills. The effort to improve individual and unit skills paid-off handsomely during the annual two-week training encampment. Readiness evaluations conducted during the encampment showed considerable progress and growth in Federal mission readiness. These enhanced Army skills also improve the Hawaii Army National Guard's readiness to respond to its State mission.*

*The Hawaii Air National Guard continued in its role of providing for the primary air defense of the Hawaiian area. This is a unique Federal mission that involves Hawaii Air National Guard radar and fighter aircraft coverage around-the-clock. The importance of this was highlighted by the groundbreaking for the new, computerized state-of-the-art, Regional Operations Control Center at Wheeler Air Force Base. When operational, this will be one of eight similar facilities across the nation, but the only one operated by an Air National Guard unit. Hawaii Air National Guard units have again proven their professionalism and readiness through successful deployment to Korea, Wyoming, California and Japan.*

*The Hawaii National Guard has actively supported and, in many cases, sponsored community projects. These efforts are supported by Guardmembers who voluntarily provide their expertise and talents. Their contributions have fostered positive relations within our communities.*

*As we look forward to the new fiscal year, our goals are for continued growth, professional development and improvements in our readiness to meet both State and Federal missions.*

Respectfully submitted,

ALEXIS T. LUM  
Major General, HARNG  
Adjutant General

# Department of Defense

## Mission

The mission of the State Department of Defense is to provide for the safety, welfare and defense of Hawaii's people.

To support its mission, the department continually strives to maintain its readiness to respond to the needs of people in the event of war or disasters, whether natural or man-made. For such purposes, the department stands ready to provide personnel, services and equipment of sound quality.

## Organization

The department is made up of three major divisions. The three divisions are the Hawaii Army National Guard, Hawaii Air National Guard and State Civil Defense. A fourth division, which is presently inactive, is the Hawaii State Guard. Under present State laws, the Hawaii State Guard may

be activated should the need arise. Although each of the three active divisions is distinct in its make up and character, they make significant contributions to the department's mission.

Five key staff offices round out the department's organization. These staff offices provide needed support services to the three active divisions and other activity centers within the department. Key departmental staff offices include the United States Property and Fiscal Office, Support Personnel Management Office, Engineering Office, Administrative Services Office and Public Affairs Office.

The Adjutant General is the executive head of the department. In addition to being a member of the Governor's Cabinet, the Adjutant General is the Commander of the Hawaii National Guard and Director of

Civil Defense.

## Hawaii National Guard

The Hawaii Army National Guard and Hawaii Air National Guard collectively form the HAWAII NATIONAL GUARD. Under the banner of the "Hawaii National Guard," the Army and Air National Guard divisions maintain, in a style unique to their military institutions, a history rich in traditions, contributions, sacrifices and high marks for excellence.

The two military divisions within the Hawaii National Guard are committed to two common missions: A state mission and a federal mission. The state mission is to support civil authorities in the protection of life and property and the preservation of peace, order and public safety. The federal mission is to provide trained and equipped

## Department of Defense

personnel and units capable of rapid deployment in times of war or national emergency.

### State Civil Defense

The State Civil Defense has two important missions. The first is to minimize the loss of life, reduce property damage, restore essential public services and expedite the recovery and rehabilitation of individuals devastated by natural or man-made disasters. The second

mission is to provide for the welfare and safety of citizens, ensure the continuance of civil government and mobilize and manage State resources in the event of war.

### Personnel

As compared to other State departments, the structure and composition of the department's full-time personnel present an interesting collage of personnel and

personnel systems. The personnel mix consists of full-time Federal employees, full-time active duty National Guard members and full-time State employees.

Part-time citizen soldiers round out the department's mix of personnel. These citizen soldiers are "drill status" members of the Hawaii National Guard who participate in military training one weekend a month and up to fifteen days of active duty each year.

# Financial Summary

## Federal Expenditures

Hawaii Army National Guard .....	\$28,622,473
Hawaii Air National Guard .....	30,641,555
State Civil Defense .....	492,170
State-administered Federal Funds for Hawaii National Guard .....	<u>401,923</u>
<b>Total</b> .....	<b>\$60,158,121</b>

## State Expenditures

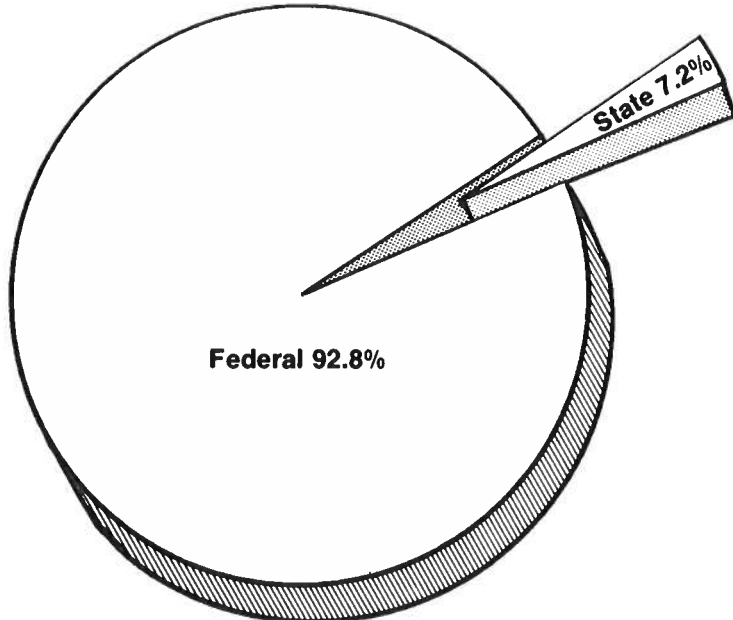

Hawaii Army National Guard .....	\$ 1,000,092
Hawaii Air National Guard .....	254,303
State Civil Defense .....	1,531,203
Departmental Administration .....	<u>1,908,478</u>
<b>Total</b> .....	<b>\$ 4,694,076</b>

**Grand Total** ..... **\$64,852,197**

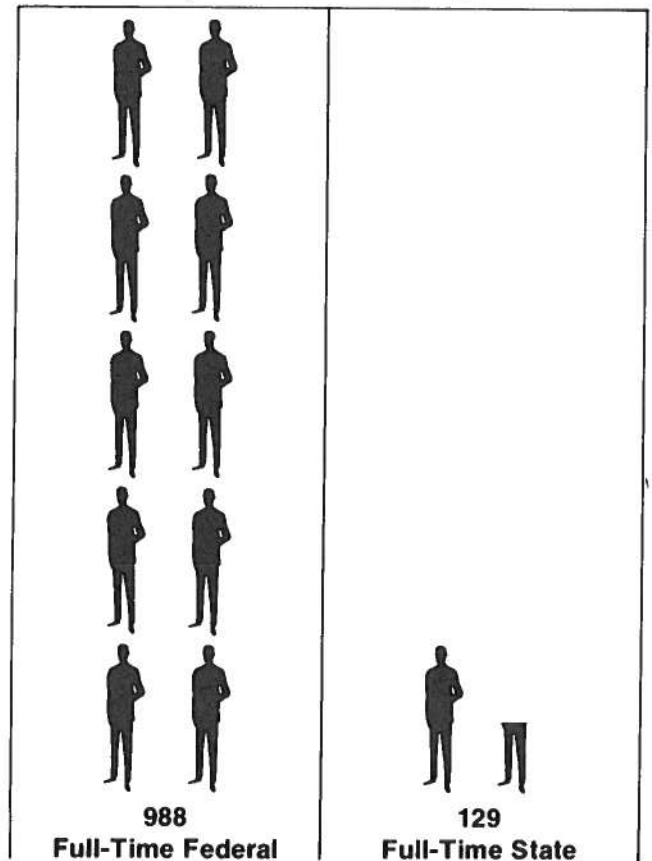

Financing for the major portion (92.8 percent) of the department's budget is provided by the Federal Government.

The Department of Defense is unique in its financial structure and contribution to Hawaii's economy. The department expends 12 times more Federal dollars than State dollars. The return on State capital stands as an excellent investment.

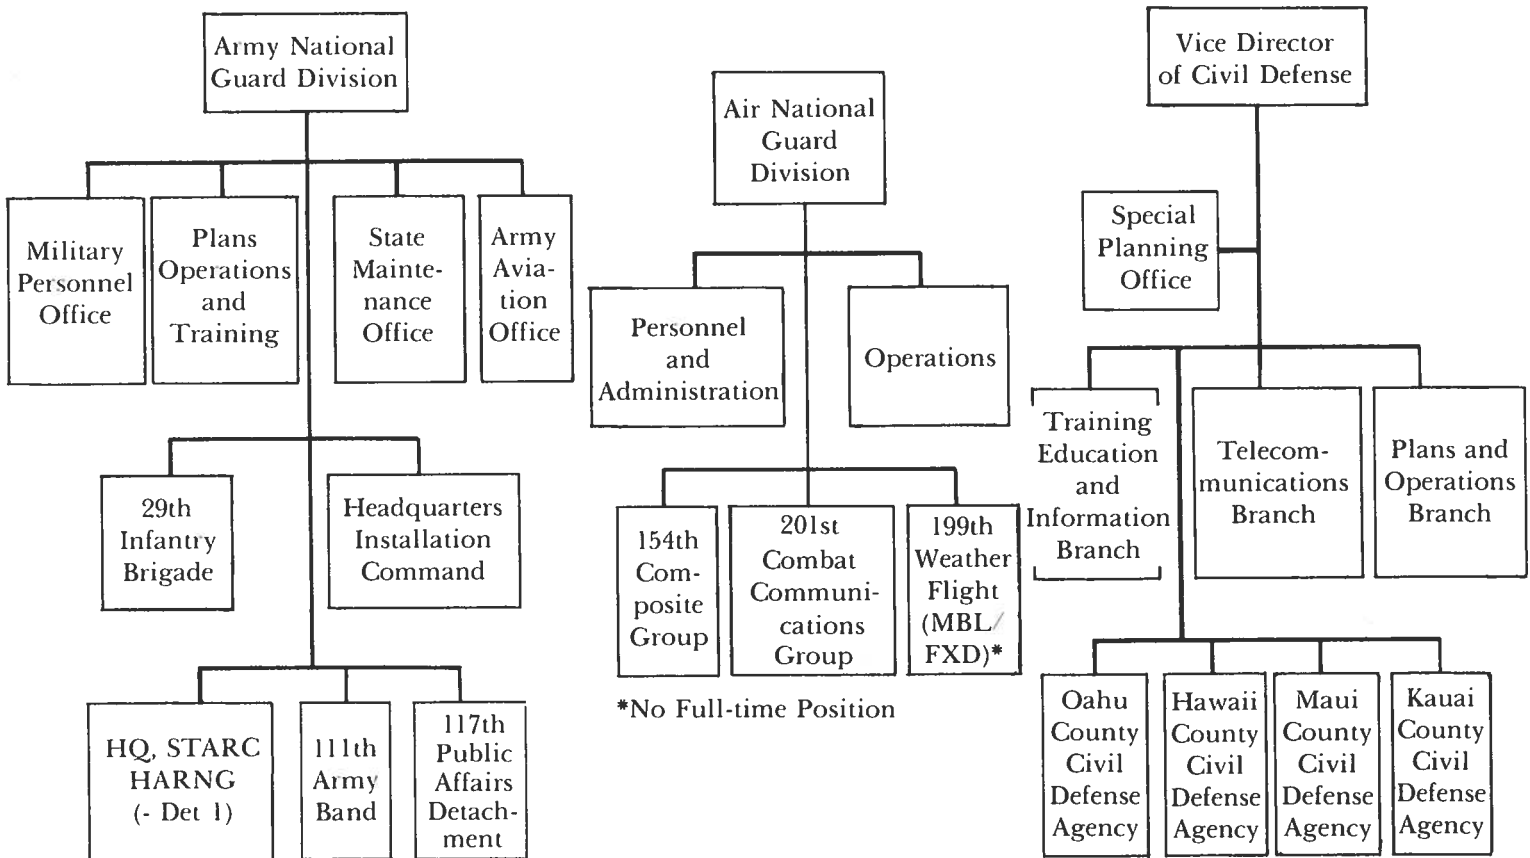

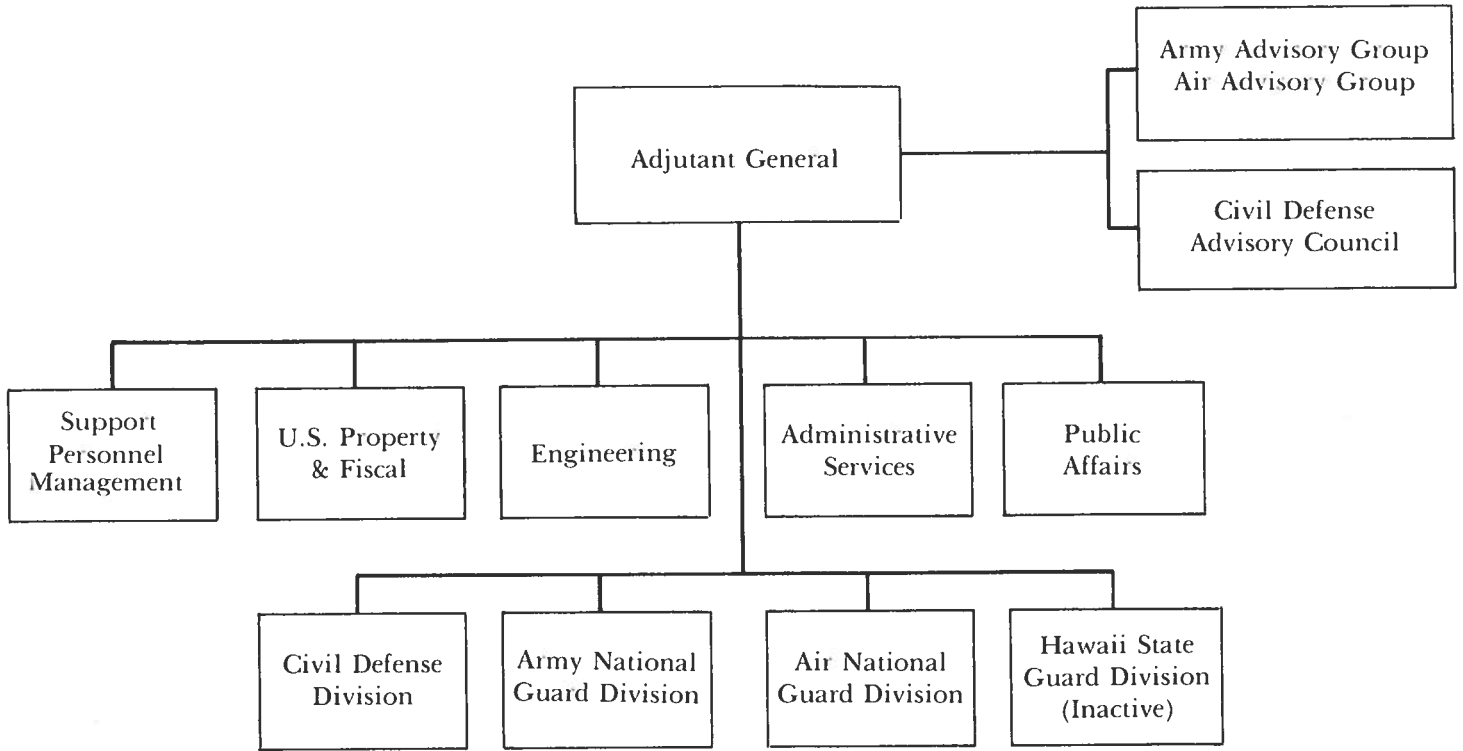

**Departmental Budget**

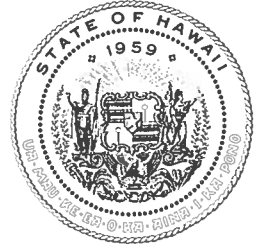

**Departmental Employees**

# Department of Defense

# HAWAII ARMY NATIONAL GUARD

## Mission

The Hawaii Army National Guard continually trains to maintain its readiness for State or Federal duty. In readiness, the Hawaii Army National Guard is prepared for local or global assignments should the Governor or the President order them to active service.

## Organization

The Hawaii Army National Guard is commanded by the Assistant Adjutant General, Army. The organization consists of its State Headquarters, the 29th

Infantry Brigade, the Headquarters Installation Command, a Headquarters Detachment, the 111th Army Band and the 117th Public Affairs Detachment.

## Strength

At the end of the fiscal year, the strength of the Hawaii Army National Guard stood at 3,768. This represents an increase of 60 from the previous year and improves the organization's strength profile to 93.9 percent of its authorized strength.

As a result of unit reorganizations, the Hawaii Army

National Guard's authorized strength decreased from 4,201 positions to 4,012 positions.

The strength for each island at the end of the fiscal year was as follows: **Oahu 2,501**, a decrease of 56; **Hawaii 704**, an increase of 74; **Maui 246**, a decrease of 2; **Kauai 265**, an increase of 44; and **Molokai 52**, an increase of 10.

The composite strength picture of the Hawaii Army National Guard included 278 commissioned officers, 116 warrant officers and 3,374 enlisted personnel. For the fiscal year, 79 percent of all those whose term of enlistment expired

# Hawaii Army National Guard

during the year extended their enlistments. As of June 1983, there were 18 female commissioned officers and 190 enlisted women in the Hawaii Army National Guard.

## 29th Infantry Brigade

The 29th Infantry Brigade is one of two major commands within the Hawaii Army National Guard. Headquartered at Fort Ruger, Diamond Head, the Brigade is made up of two infantry battalions and a field artillery battalion. While the field artillery battalion is located entirely on Oahu, the two infantry battalions are located primarily on the neighbor islands. One of the infantry battalions is headquartered on Maui and has subordinate units on Kauai, Molokai and Oahu. The other infantry battalion is headquartered on the Big Island and has its units dispersed throughout that island.

In the event of serious national emergency requiring the federalization of National Guard Forces, the 29th Infantry Brigade is designated to organizationally

round out the U.S. Army's 25th Infantry Division. As a roundout force, the 29th Infantry Brigade would become the Third Brigade of the 25th Infantry Division. Because of its roundout designation, the 29th Infantry Brigade continues to maintain its readiness to mobilize and deploy for Federal military duty on short notice and minimum delay. In this regard, the 25th Infantry Division continues to provide excellent guidance and supervision.

## Headquarters Installation Command

The Headquarters Installation Command is another major command within the Hawaii Army National Guard. Headquartered at Waiawa, Oahu, the Headquarters Installation Command is made up of three combat service support battalions.

Units of the Headquarters Installation Command are located primarily on Oahu at Fort Ruger, Pearl City, Wahiawa, Bellows Air Force Station and Wheeler Air

Force Base. An aviation detachment is located at Keaukaha Military Reservation, Hilo, Hawaii.

The units within the Headquarters Installation Command provide a broad spectrum of combat support and services. The kinds of support and services the Headquarters Installation Command provides include: aerial and ground reconnaissance; aerial fire support; tactical aerial transport of troops and cargo; combat engineering; storing and issuing supplies; repairing and rebuilding military equipment; maintenance for vehicles, weapons, helicopters, and sophisticated electronic equipment; ground transportation for troops and cargo; medical care and evacuation and field services which include baking, laundering and renovation of textiles.

## Annual Training

The Hawaii Army National Guard conducted annual training during July and August 1982. The 29th Infantry Brigade, the 1154th

# Hawaii Army National Guard

Transportation Company, and the 1293rd Aviation Company (Combat Support) trained at the Pohakuloa Training Area on the island of Hawaii.

Under the Roundout Program, Army Guard roundout units were placed under the operational control of the 25th Infantry Division. The U.S. Army Reserve's 100th Battalion, 442nd Infantry, was placed under the operational control of the 29th Infantry Brigade. Under present roundout plans, the 100th Battalion becomes a unit of the 29th Infantry Brigade. This association, which closely resembled an actual mobilization, created a command environment beneficial to training.

The highlight of annual training for the 29th Infantry Brigade was a 48-hour combined arms field training exercise controlled by the brigade's staff. During August, units of the Headquarters Installation Command successfully performed annual training at Schofield Barracks' Area X. Participating units provided

logistical support to all Army Guard units training with troops of the 25th Infantry Division.

The following Army Guard units performed their annual training outside the State:

The 298th Engineer Detachment was sent to Guam in July to perform site improvement projects for the Guam National Guard.

The 297th Supply and Service Battalion participated in a North Atlantic Treaty Organization exercise in Belgium during September. The Battalion supported active Army units deployed from the United States to Europe.

More than 100 members of the 227th Engineer Company performed their annual training at Camp Casey, Korea, as part of the United States Army Western Command overseas deployment training.

## Deployments

In January, select members of the Army Guard participated in

training exercises sponsored by the United States Army Western Command. Exercise Tasman Reserve was held in New Zealand and Exercise Pacific Glance was held in New Zealand and Australia. These exercises brought together members of the active military, Army Reserve and Army National Guard for counterpart training.

To prepare commanders and staff officers for combat operations, the 29th Infantry Brigade and the United States Army Western Command Readiness Element conducted a Computer Assisted Map Maneuver System command post exercise for all infantry and field artillery battalions during February 25-27, 1983. The exercise was supported by the 25th Infantry Division.

## Aviation

It was another year of significant accomplishments for Hawaii Army National Guard aviation units. The year was marked by positive gains in individual flying training, unit

## Hawaii Army National Guard

training and completion of numerous missions in support of the community and other government agencies. Aviation units, in line with the objectives of the Roundout Program, have continued to increase their value to the active Army. These units include the aviation section of the 29th Infantry Brigade, Troop E (Air) 19th Cavalry, and the 1293rd Aviation Company (Combat Support).

Hawaii Army National Guard aviation units flew a total of 5,217 hours to accomplish individual and unit aviation training programs and support missions essential to maintaining combat readiness standards expected of Army National Guard aviation units. The total number of hours flown represent a completion rate of 99.8 percent of the total number flying hours programmed for the year. Major aviation programs included local rotary wing qualifications, Nap-of-the-Earth qualifications,

AH-1S Cobra new equipment training, aerial gunnery qualifications and instrument qualifications. Continued emphasis was placed on proficiency tasks for all day and night flying. Aviation units flew approximately 600 hours in support of victims of Hurricane Iwa, monitoring lava flows and law enforcement agencies.

### Maintenance

The State Maintenance Office is responsible for maintaining all military ground surface equipment issued to the Hawaii Army National Guard. A full-time staff of 82 individuals employed at eight maintenance facilities throughout the State provided over 170,000 man-hours in repairs and periodic maintenance. Their efficiency enabled the Army Guard to achieve an equipment readiness rate of 96 percent.

The State Maintenance Office continued to expand its use of the

Army's Oil Analysis Program (AOAP) to include the majority of engine powered equipment issued to the Army Guard. The application of the AOAP has provided appreciable cost savings associated with equipment maintenance. Besides the early detection of abnormal wear in the power train component, the AOAP allows oil changes to be based on analysis rather than changes based on time/mileage. This change in procedure has saved the Army Guard many man-hours and material which resulted in cost savings.

In anticipation of new and more complex equipment to be issued under the Army's Force Modernization Program, maintenance personnel have attended new equipment training classes in Hawaii and on the mainland.

### Training and Education

The Hawaii Military Academy

## Hawaii Air National Guard

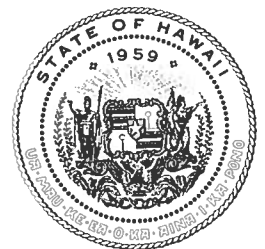

Officer Candidate School, Hawaii Army National Guard, graduated 13 candidates. Eleven graduates received their commissions as second lieutenants while two graduates deferred their commissioning to a later date. Ken N. Tsutsumi was awarded the Distinguished Graduate Award; Mathew N. Nagasako received the Leadership Award; Stephen F. Logan took the academic honors; John Kakazu was the Most Improved; and Ken N. Tsutsumi also received the Physical Training Award.

Eleven Army Guard members completed the 50-hour Senior Noncommissioned Officers Course. Another sixty-eight Army Guard members completed the 60-hour Advanced Noncommissioned Officers Course. These two courses are designed to refine leadership skills of enlisted personnel.

### Law Enforcement

The Hawaii Army National Guard continued to support "Operation Green Harvest" with helicopter and personnel. "Operation Green Harvest" seeks to significantly reduce the production of marijuana. In July 1982, rappelling training assistance was provided to law enforcement personnel in the Federal Bureau of Investigation.

# HAWAII AIR NATIONAL GUARD

## Mission

The Federal mission of the Hawaii Air National Guard is to provide trained units and qualified personnel for Federal military service in time of war or national emergencies. The Federal mission, geared to the support of the U.S. Air Force, also includes, since 1956, the Air Defense of the State on a 24-hour-a-day basis. The Hawaii Air National Guard also supports its State mission which calls for the provision of personnel and equipment in the event of State emergencies.

## Organization

The Hawaii Air National Guard is commanded by the Assistant Adjutant General, Air. The command encompasses the 154th Composite Group, 201st Combat Communications Group and 199th Weather Flight.

## Strength

The assigned strength of the Hawaii Air National Guard at the end of the fiscal year was 213 officers and 1,818 enlisted personnel for a total of 2,031 members. This was 96 percent of the 2,115 positions authorized.

## 154th Composite Group

The largest unit in the Hawaii Air National Guard is the 154th Composite Group. As its name implies, the group is made up of a number of organizations including a tactical fighter squadron of F-4C Phantom fighters, two aircraft control and warning squadrons and other support units.

During the year, the Group continued to improve its combat readiness and organizational effectiveness through its participation in long distance deployments and local exercises. Aircrew and ground personnel were

# Hawaii Air National Guard

rewarded for their diligence during a Management Effectiveness inspection phases, the Group earned an "excellent" rating. This rating was one of the highest ratings ever awarded to a Pacific Air Force unit, even among active Air Force units within the command. Another highlight to a year of high achievement was the National Guard Bureau's citation of the Group with its Distinguished Flying Unit Award. Nationally, only two flying units are given the Air National Guard Distinguished Flying Unit Award each year.

## 201st Combat Communications Group

The units of the 201st Combat Communications Group are dispersed throughout the State. While its headquarters is located at Hickam Air Force Base, its subordinate units can be found on Hawaii, Maui, Oahu and Kauai.

During the year, the U.S. Air Force evaluated the Group's management effectiveness. Within the context of the Group's assigned mission and functions, Air Force

examiners reviewed the Group's leadership, management, installation support, human relations and service to customers. The Group received an overall rating of "satisfactory" while many individual functional areas within specific units were singularly rated "excellent."

The high demand for the Group's trained personnel and equipment continued throughout the fiscal year. Under assignments given by the U.S. Air Force, various units and individuals from the Group provided technical, equipment and expert support to U.S. Air Force exercises and deployments.

## 199th Weather Flight

The 199th Weather Flight, the smallest unit in the Hawaii Air National Guard, provides meteorological support to the active military, reserve and guard components of the Army and Air Force. Meteorological information produced by the 199th Weather Flight is fed into the worldwide meteorological network operated jointly by the Air Force's Air Weather Service, National Weather Service, and World Meteorological

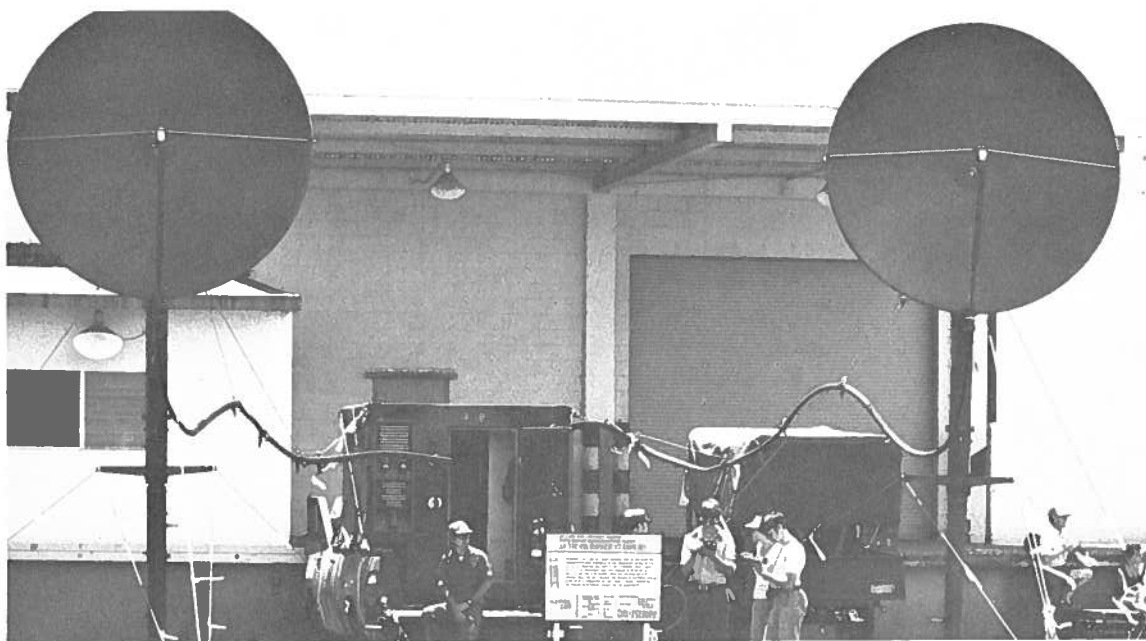

Organization.

During the year, the Military Airlift Command rated the Weather Flight's management "excellent." The Weather Flight was presented with the Hawaii Air National Guard Outstanding Unit Award for its efficiency, effectiveness and productivity.

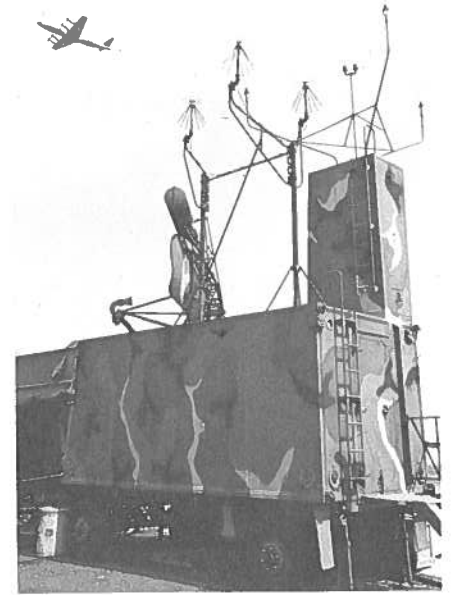

## Training

Hawaii Air National Guard units conducted extensive training operations locally and overseas.

The 154th Composite Group successfully increased its overall skill qualification rate. To increase the skill level of its members, the Group expanded and intensified its effort to create training opportunities to develop new skills and reinforce skills already acquired. Well-defined and executed exercises such as Opportune Journey, Cope Canine, Sentry Tiger and Team Spirit 83 provided excellent environments for the development of individual skills, coherence in Group operations and organizational effectiveness. The development of skills and the proficiency of its application are significant

# Hawaii Air National Guard

corollaries to the Composite Group's ability to carry out assigned missions to support active military forces.

The 201st Combat Communications Group directed all of its training efforts toward increasing unit readiness. An expected Operational Readiness exercise heightened the intensity of readiness training for all units. The Group's units participated in local mobilization exercises, in-house systems training and field deployments. Group members who deployed to Team Spirit 83 received excellent training under field conditions.

The 199th Weather Flight conducted training throughout the year at Wheeler Air Force Base. Guided by the Total Force Policy, the Weather Flight performed duties usually performed by active military units of the Air Weather Service. The Total Force Policy encourages National Guard units, such as the 199th Weather Flight, to assume operational responsibilities for functional areas where the active military cannot reasonably support.

## Deployment

During the year, units of the Hawaii Air National Guard travelled to near and distant places for deployment training.

A select group of the 154th Composite Group's 199th Tactical Fighter Squadron, 154th Consolidated Aircraft Maintenance Squadron and other support units flew west to Kunsan Air Base, Republic of Korea, to take part in Team Spirit 83 exercises. The movement of aircraft, equipment and personnel to distant Kunsan Base was difficult but not insurmountable. The challenges involved in such a move helped to further strengthen the stature of the group's mission readiness.

The 154th Composite Group's Civil Engineering Flight travelled, at different times of the year, to Francis E. Warren Air Force Base, Cheyenne, Wyoming; and Moffett Field Naval Air Station, California. In both deployments, the Civil Engineering Flight undertook major repairs and construction work which challenged their combat engineering skills.

During February, March and April 1983, the 201st Combat Communications Group sent 203 of its personnel to Korea for Exercise Team Spirit 83. The group's exercise mission was to provide voice and teletype communications, air traffic control and air-to-ground support in various locations in Korea. The Group's participation in Exercise Team Spirit 83 marked the eighth year in which the Group participated in team spirit exercises. The purpose of team spirit exercises is to test the ability of Korean and American armed forces to respond to potential military action on the Korean Peninsula.

In addition to Exercise Team Spirit 83, the 201st Combat Communications Group deployed its units to various locations worldwide for air traffic controller training and other types of mission training.

## HAWAII NATIONAL GUARD SUPPORT OF GOVERNMENT & COMMUNITY ACTIVITIES

The Department of Defense contributes to the community in many ways. Men and women of the Hawaii National Guard are frequently called upon to assist in various emergencies. Also, as individuals or units, they often volunteer to aid in a multitude of community service activities.

### Disaster Relief Assistance

On November 23, 1982, Hurricane Iwa's destructive force struck the islands of Oahu and Kauai. Its hurricane winds and powerful ocean surges devastated Kauai and parts of Oahu. People on both islands found themselves without electricity, water, food, clothing and, in many cases, without homes.

Throughout the ordeal, Hawaii

National Guardsmen were deeply involved in the effort to mitigate the effects of Hurricane Iwa. Long before Hurricane Iwa reached the shores of Hawaii, Hawaii Air National Guard radar controllers of the 150th Aircraft Control and Warning Squadron were busily providing important hurricane tracking information to State Civil Defense authorities. Since the National Weather Service had lost the services of its Pacific Weather Satellite, the tracking information provided by the 150th Aircraft Control and Warning Squadron allowed State Civil Defense officials to make critical decisions to warn the general public. Early warnings enabled the general public to adequately prepare for Hurricane Iwa's impact.

Many Hawaii National Guard

personnel responded unselfishly to the call of duty. On Kauai, many Hawaii Army National Guard soldiers reported to their armory to assist various neighborhood communities. Although the contributions of the Army National Guard unit on Kauai speak for themselves, the awards and decorations earned by its soldiers serve to underscore the value of such contributions. For their heroism, three Army National Guard soldiers from Kauai were awarded the Medal for Merit, the highest Hawaii National Guard award. The efforts of the three medalists saved the lives of several Kauai residents. Additionally, eight Army National Guard soldiers from Kauai were awarded the Hawaii National Guard Commendation Medal for their tireless effort

# Hawaii National Guard's Support of Government and Community Activities

during Hurricane Iwa's passage and during the wake of its destruction.

The Hawaii Air National Guard also contributed significantly to mitigation and relief efforts. To support Kauai's life support requirements, the Hawaii Air National Guard was able to transship on board a C-141B, provided by the Military Airlift Command, critically needed equipment, support technicians and supplies to Kauai from distant points throughout the State. Hawaii Air National Guard communication specialists from the 202nd Air Traffic Control Flight on Kauai provided a communications system linking a number of relief activities.

The scope and depth of the Hawaii National Guard's involvement in the effort to mitigate the effects of Hurricane Iwa ranged from Waianae to Laie on Oahu to Kilauea and Poipu on Kauai. The Hawaii National Guard was there providing field communications, equipment,

security and other disaster relief assistance. From all accounts, more than 330 Hawaii Army and Air National Guard members served on state active duty to provide assistance to communities on Oahu and Kauai.

Potential dangers from powerful natural forces are never ending. On February 1983, in the aftermath of Hurricane Iwa, huge storm waves began battering the northern coastlines of Oahu and Kauai. The storm waves, sometimes towering to as high as 30 feet, threatened many shoreline residents. In that episode, a total of 114 Hawaii National Guardsmen were placed on state active duty to support the evacuation of families from threatened shoreline areas.

Hawaii's periodic episodes with Madame Pele are another source of danger which constantly requires the support of the Hawaii National Guard. In early January, Hawaii Army National Guard UH-1H "Huey" helicopters stationed on the Big Island were used to transport U.S. Geological Survey

teams and Civil Defense officials to assess potential threats and determine the requirements for advanced preparation.

In February, Hawaii Army National Guard soldiers were called to state active duty to battle raging brush fires caused by hot lava flowing over dry land areas.

In March, Big Island Army National Guard soldiers were again called to state active service. In that call-up, Army Guard soldiers evacuated Paradise Park residents when the subdivision was threatened by huge masses of molten lava. Throughout the year, more than 130 Big Island Hawaii Army National Guard soldiers were placed on active duty to assist geologists and County Civil Defense officials mitigate the threat and disasters brought on by volcanic eruptions.

## Community Relations

The Hawaii Air National Guard's 150th Aircraft Control and Warning Squadron hosted the 15th Annual Kauai Senior Citizens Day.

## Hawaii National Guard's Support of Government and Community Activities

More than 100 Kauai senior citizens took an active part in the day's festivities. The seniors enjoyed such activities as lawn bowling, horseshoes, softball games and relay races.

On December 6, 1982, light showers and intermittent heavy downpours did not hamper the participation of more than 150 Hawaii National Guard soldiers and airmen in Governor George R. Ariyoshi's inaugural ceremony. In full military dress, soldiers and airmen escorted guests, controlled parking and executed, for the first time in modern inaugural history, a 19-gun salute to the state's Chief Executive and Commander-in-Chief of the Hawaii National Guard.

During the centennial celebration held in honor of Hawaii's last king, David Kalakaua, soldiers from the Hawaii Army Guard's 1st Battalion, 487th Field Artillery, fired a 21-gun salute with their 105mm Howitzers. The ceremony took place on the grounds of historic Iolani Palace.

Volunteers from the Hawaii Army National Guard's 229th

Medical Company assisted the Ala Moana Jaycees during their annual "Walk for Mankind." The volunteers set up and staffed a first-aid station to assist weary walkers in need of first aid or a place to rest.

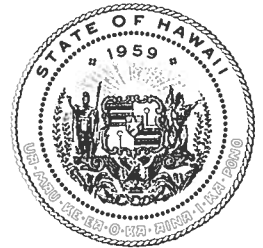

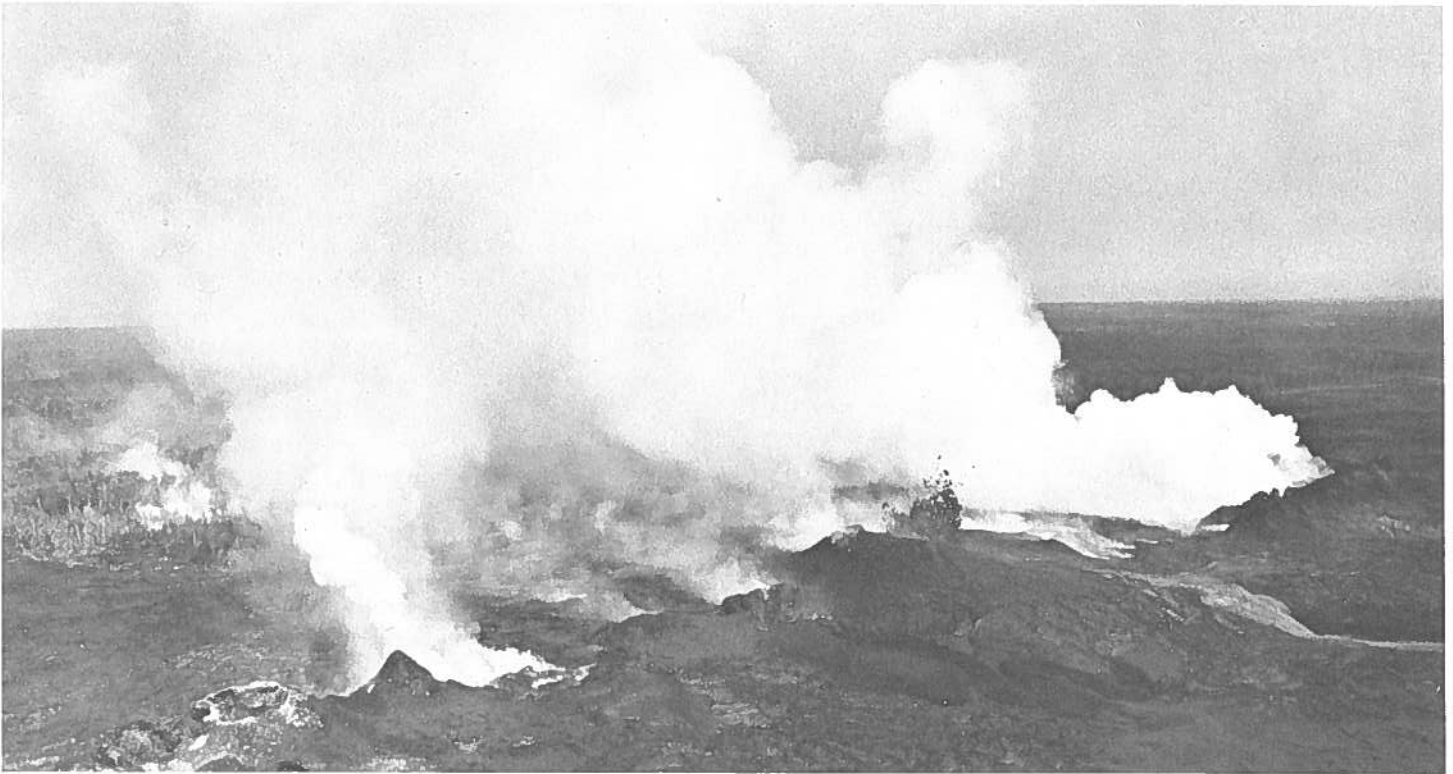

During one weekend drill, combat engineers from the Hawaii Army Guard's 227th Engineer Company assisted the State Department of Land and Natural Resources and Waianae High School. With their bulldozers and five-ton trucks, the combat engineers removed keawe brush and debris to clear the way for a new baseball field at Waianae High School. A short distance away, on the Mokuleia side of Kaena Point, another group of combat engineers removed many abandoned cars along the unpaved road and inland terrain. In addition to being valuable to the community, these projects also serve to enhance the organizational and practical skills of combat engineers.

At the request of the State Department of Social Services and Housing, Hawaii National Guard

soldiers and airmen distributed more than 409,000 pounds of federal surplus cheese to Hawaii's needy families. The cheese was distributed to 32 locations throughout the State.

The Hawaii Air National Guard's Royal Guard supported many ceremonial events. Dressed in uniforms of the 1800's, Royal Guard members participated in such events as the King Kamehameha Day parade, the Merrie Monarch Festival, the Governor's inaugural ceremony and the annual posting of the guard at Iolani Palace. Three Royal Guard members accompanied the Royal Hawaiian Band during its European Tour.

The Hawaii National Guard's participation in the annual Armed Forces celebration highlighted the year. In addition to the display and demonstrations at Hickam Air Force Base, the Hawaii National Guard hosted an Armed Forces Day Open House at Hilo Airport. The open house was well-attended by Hilo residents who viewed a variety of military equipment.

# STATE CIVIL DEFENSE

## Mission

The primary mission of State Civil Defense is to provide for the welfare and safety of citizens, ensure, in the event of war, the continuance of civil government and mobilization and management of State resources. A collateral mission is to minimize the loss of life, reduce property damage, restore essential public services and expedite the recovery and rehabilitation of affected individuals in the event of natural or technological disasters.

Although the primary mission of Civil Defense has not changed, based on Federal guidelines, the emphasis has been placed on the integration of wartime and peacetime emergency planning and

preparedness under an "all-hazards" concept.

## Organization

State Civil Defense is responsible for coordinating civil defense activities of all organizations in the State, both public and private.

Appointed by the Civil Defense Director, the Mayors of each county serve as Deputy Directors of Civil Defense. The counties are responsible for county operational planning and response for all civil defense emergencies occurring in their respective counties.

In the event of a disaster beyond a county's control, or if two or more counties are affected by a single disaster, the Director of Civil Defense may assume direct operational control over all or any

part of the disaster relief effort within the State.

State Civil Defense reviews and approves annual programs for each county and makes appropriate recommendations to the regional office of the Federal Emergency Management Agency (FEMA).

County civil defense staffing patterns, applications for Federal funds and project applications for State and Federal natural disasters are reviewed and approved by State Civil Defense.

## Personnel

Personnel turnover continued to be a problem during the fiscal year. There were five retirements and resignations during the year and two additional personnel losses

## State Civil Defense

effective June 30, 1983.

The turnover of personnel, including the Director of Civil Defense, impacted heavily on the workload, continuity and direction of the division.

The number of authorized professional, technical and clerical staff remained at 27 persons.

### Federal Emphasis

FEMA continued to emphasize the dual-use concept of emergency resources for both peacetime and wartime disasters.

During the fiscal year, FEMA, through its approved national strategy for survival, stressed population protection through enhanced shelter programs and the movement of citizens from target areas to areas of lesser risk.

State Civil Defense supports FEMA's current and proposed emphasis on "all-hazards" planning as part of the national strategy for peacetime and wartime survival.

### Disaster Response

The State Emergency Operating

Center in Birkhimer Tunnel, Diamond Head Crater, was activated 13 times in response to disaster conditions throughout the State for a total of 25 days. In addition, State Civil Defense staff monitored and responded to other crises although activation of the Emergency Operating Center was not required.

There were 28 days of small craft advisories, 24 days of flash flood watches and warnings, 151 days of high surf advisories, 62 days of high wind watches and warnings, 29 days of forest/brush fires, 38 days of volcanic eruption and lava flow, 9 waterspouts, 2 funnel clouds, 10 hurricanes and tropical storms in Hawaiian waters, 11 earthquakes of sufficient magnitude to trigger alarms at the Pacific Tsunami Warning Center in Ewa Beach, and 2 minor tsunamis.

### State and Federal Disaster Aid

The effects of Hurricane Iwa, November 23, 1982, resulted in a gubernatorial proclamation of

disaster for the County of Kauai and the City and County of Honolulu. The Governor made available \$750,000 from the State disaster fund to assist in recovery.

In addition, the Governor sought and obtained a Presidential disaster declaration to assist the State and counties' efforts.

State Civil Defense coordinated with FEMA to identify and justify more than 1,000 State and county disaster projects on Oahu and Kauai eligible for Federal public assistance funds. In addition, the Governor sought and obtained the President's approval to implement the Individual and Family Grant Program for Oahu and Kauai. The Governor also requested the Small Business Administration to extend its assistance to small businesses in Maui and Hawaii counties that suffered damage from the effects of Hurricane Iwa.

Joint Federal-State-County Disaster Assistance Centers served more than 8,500 persons on Oahu and Kauai following the hurricane.

Hurricane Iwa damages to public

and private property were estimated at approximately \$234 million.

Hurricane Iwa was the most costly disaster in the history of the State.

- Numerous grassland fires in the Puna District, Hawaii County, during February and March 1983 resulted in the receipt of Federal disaster assistance under the provision of the Fire Suppression Grant, Section 417, PL 93-288.

- Drought conditions from February 15 through May 31, 1983, resulted in a State disaster proclamation for Hawaii County. The Governor made available \$750,000 from the State Disaster fund to assist in alleviating the drought condition. The funds were used to develop emergency and alternate water sources and to improve existing water distribution systems to mitigate against existing and future drought conditions in the affected areas of the Big Island.

- Administration of four previously declared Presidential major disaster declarations continued throughout the year. Final Federal audits and subsequent completion of the administrative responsibilities of two of these disasters are ongoing.

At this time approximately \$12.55 million in Federal disaster assistance will accrue to the State and counties as a result of the March 30 to April 2, 1982, Maui Heavy Rains and Flooding disaster and the November 23, 1982, Hurricane Iwa disaster.

## Planning

During noncrisis periods, State Civil Defense served as the administrative focal point for all civil defense planning, program development and training within the State. Such activities included:

- The State of Hawaii Plan for Emergency Preparedness, Volume I, **Operational Civil Defense**, which establishes nonmilitary measures

necessary to organize, mobilize and direct the civilian population and resources of the State in case of enemy attack, was subject to an extensive review and update during FY 83.

- The State of Hawaii Plan for Emergency Preparedness, Volume II, **Emergency Resources Management**, which establishes an emergency resources management program for the survival of individuals and the recovery of the economic system as a result of a civil defense emergency, was revised. The draft revision was circulated for agency coordination and review and updated accordingly. Final publication of the document will be held in abeyance pending receipt of updated and current Federal guidance on resource management.

- The Individual and Family Grant Program Plan, which provides a joint Federal/State grant to disaster victims to meet disaster related necessary expenses or serious needs, was revised and published prior to the arrival of Hurricane Iwa. This facilitated immediate FEMA approval of the State's request for the Individual and Family Grant Program assistance to individuals suffering hurricane related losses.

- The State Marine Oil Pollution Contingency Plan, which outlines State/county responsibilities to provide assistance to the U.S. Coast Guard in the event of a major oil spill within Hawaiian waters, was published.

- An Earthquake Planning Guide was published in December and distributed to State departments and agencies and the county civil defense agencies. This guide was prepared primarily for the follow-on development of earthquake contingency plans for the densely populated and vulnerable Honolulu area. State Civil Defense has drafted a supplement to

Volume III focusing on earthquake disaster response.

- The development of a draft Statewide Radiological Defense Annex to Volume I continued. The draft includes appendixes that address aerial and surface radiological monitoring, fallout prediction and warning and functions and responsibilities of State and county departments and agencies. The draft will be coordinated with State and county agencies.

- A Space Vehicle Reentry Impact Contingency Plan was developed and published in FY 83 to meet the potential hazards associated with the Soviet satellite, Cosmos 1402, reentry.

- A manual of procedures covering the use and control of radiation training source sets was developed and distributed to appropriate radiological training personnel during FY 83.

- The State Civil Defense Maintenance and Calibration Facility serviced 3,395 individual equipment items, calibrated 3,070 survey meters and distributed 371 radiological monitoring instrument sets to various civil defense activities.

## Training

The State Civil Defense training program reached nearly 600 persons with a variety of workshops, seminars and courses in FY 83.

## Public Information and Education

State Civil Defense began an aggressive public awareness campaign in FY 83. In July 1982, State Civil Defense participated in Hawaii Hurricane Preparedness Week with the National Weather Service and, during the last three months of FY 83, prepared an intensive Hurricane Week campaign for July 1983.

State Civil Defense staff

## State Civil Defense

developed a slide show on "Hurricane Iwa" as well as a slide show, "Hurricanes in Hawaii." A pamphlet, "Hurricane: A Guide for Hawaii Residents," was published. The pamphlet includes information on the threat of hurricanes to the islands, as well as tips on how to prepare for a hurricane. State Civil Defense also prepared a brochure, "Hurricane Preparedness Information for Boaters," which was distributed during the 1983 Hurricane Week.

The emphasis in all public information and education programs is that citizens must take responsibility for their own lives and property and that of their families. Government does not have the resources to assist every person individually during a time of emergency. Early preparation saves both lives and property.

### Communications

State Civil Defense continued to operate and maintain the State Civil Defense communications and warning systems including an inventory of more than 1,000 pieces

of telecommunications equipment installed and scattered over 300 locations throughout the State.

Monthly tests of the Emergency Broadcast System were conducted with the accompanying loud blast of 220 outdoor warning sirens.

In the aftermath of Hurricane Iwa, a telecommunications upgrade proposal was submitted to Governor Ariyoshi, FEMA Region IX, members of the State Legislature and the State Emergency Communications Committee (broadcast industry) to increase the reliability and survivability of the State and County Emergency Broadcast Systems, the outdoor alerting/warning system, the Inter-Island Teletype network and the hotline telephone and radio systems between the State and County Emergency Operating Centers.

The proposal is to provide redundancy and multipath systems between jurisdictional areas and, based on tentative approval from all concerned, the completion of the upgrade proposal is planned over the next five years.

Twenty-one of Kauai's 32 outdoor warning sirens were damaged or demolished by Hurricane Iwa. A siren recovery contract was advertised by State Civil Defense with bids opened in July 1983.

### Civil Defense Advisory Council

The State Civil Defense Advisory Council is made up of seven members appointed by the Governor to counsel on emergency preparedness and civil defense matters:

Victor K. Punua, Chairman  
Albert F. Alfonso, Vice Chairman  
Les S. Ihara  
Robert H. Ishimoto  
Rev. David K. Kaupu  
Roland D. Sagum  
Roy M. Seki

# U.S. PROPERTY AND FISCAL OFFICE

## **Mission**

The United States Property and Fiscal Office is the federal agency responsible for obtaining and providing funds, supplies, equipment and services for the state for National Guard purposes.

## **Organization**

Three staff divisions comprise the United States Property and Fiscal Office: administrative, logistics, and comptroller. The office is authorized 59 full-time federal technicians.

This division performs administrative services in support of the United States Property and Fiscal Office operations by maintaining a centralized filing system, reproducing and disseminating publications, and providing stenographic services.

## **Data Processing Installation**

The Data Processing Installation provides services to the United States Property and Fiscal Office, Hawaii Army National Guard, State Maintenance Office, the Support Personnel Management Office, and the Guam Army National Guard. The installation operates a Burroughs 1955 minicomputer to process supply, personnel, fiscal accounting and reporting data utilizing standard military and locally designed programs.

## **Analysis and Internal Review Branch**

This branch conducts annual audits, internal reviews, and special examinations to assure that federal funds and equipment are properly safeguarded and accounted for. During the course of federal fiscal year 1983, 73 examinations and reviews were conducted by on-site visits to all Hawaii National Guard units and activities.

## **Comptroller Division**

Federal funds allotted to the Hawaii National Guard from Congressional appropriations are managed by this division with separate offices to administer funds assigned to Army and Air operations.

The Army Guard office located in the Diamond Head Crater is composed of the Budget, Fiscal Accounting, and Military and Technician Pay Branches. Federal funds used by the Army National Guard during the federal fiscal year totaled \$28,622,473.

An Assistant United States Property and Fiscal Officer for Air (Fiscal) controls funds allocated for support of the Hawaii Air National Guard. His office is located at Hickam Air Force Base. Federal funds used this year by the Air National Guard amounted to \$30,641,555.

Both Army and Air Guard offices provide fiscal and pay-related support to the Guam National Guard.

Table 4 of the Appendix reflects federal dollars used between October 1, 1982 and September 30, 1983.

Military payrolls for the Army and Air Guard totaled \$20,167,972 this federal fiscal year.

## **Purchasing and Contracting Branch**

Contracting and procurement services are provided by this branch to all activities of the Hawaii National Guard by formal advertisement or by negotiation in accordance with Defense Acquisition Regulation. Purchases are made from commercial business firms on the islands of Oahu, Maui, Kauai, Molokai, and Hawaii. During federal fiscal year 1983, local procurement in support of Hawaii National Guard units and activities totaled \$1,407,275.

Additionally, the office reviewed and established major construction contracts for projects valued at \$698,407.

## **Logistics Division**

This division, organized into Stock Control, Supply, and Traffic Branches, provides logistical support and guidance to the Hawaii Army National Guard and the Guam Army National Guard. It also provides support to the Hawaii Air National Guard for the movement of personnel and equipment.

During the fiscal year, a total of \$2,058,230 was spent to procure supplies and equipment for the Hawaii Army National Guard. It maintained an inventory valued at \$310,647.

The Traffic Branch, during the fiscal year, arranged transport for 6,828 individuals; 3,288 for military inter-island airlifts, 1,928 commercial trips to the mainland, and 1,612 commercial inter-island trips. A total of 2,217 tons of cargo was shipped for annual training; 101 tons went to the mainland, and 633 tons had inter-island destinations. Total spent to transport personnel and equipment is shown in Table 4. In June 1983, a part time Scheduled Airlines Traffic Office (SATO) was established at the Traffic Branch. This office provides the entire array of airline services; i.e., makes flight reservations and writes tickets on airlines, handles air freight, arranges hotel/motel reservations, car rental reservations, and other travel requirements.

An Assistant United States Property and Fiscal Officer for Air (Property) provides logistical support and guidance to the Hawaii Air National Guard. His office is located at Hickam Air Force Base.

During the past federal fiscal year, the Air National Guard

## U.S. Property and Fiscal Office

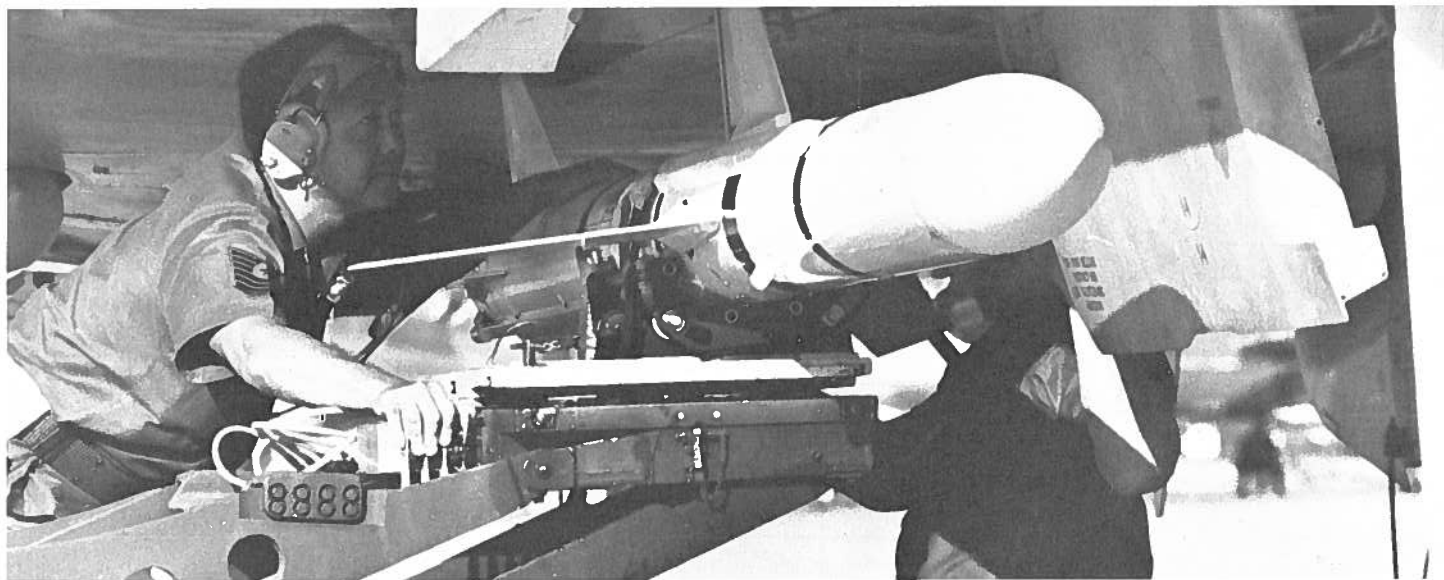

received \$2,889,748 for supplies, an increase of \$824,430 over fiscal year 1982. The additional funds were required for continued inflationary costs in the maintenance of the F-4C Phantom jets and increased needs of the 201st Combat

Communications Group's units.

The base supply operation processed 329,918 transactions in federal fiscal year 1983, a monthly average of 27,493. The in-house inventory was \$7,573,644 at the beginning of the fiscal year; the

stockage effectiveness rate was 87 percent. At the year's end, the inventory value was \$10,411,766 with the stockage effectiveness at 88 percent.

In related areas, the National Guard Bureau allocated \$99,107 for commercial contract services.

## Administrative Services

### Mission

The Administrative Services Office provides military and State administrative support to the Adjutant General's office. It coordinates and controls all planning, programming, budgeting and execution of departmental programs.

### Organization

Three separate staff elements provide office, personnel, and financial management services. The office has 14 full-time State employees who are responsible for the four program areas.

### Activities

*Office Services and Communications Management:*

The department's office services and communications management are centralized under this office. It is responsible to the department head for the effective monitoring, review, distribution, and filing of communications received from Federal, State, and local governments and the civilian community.

*Legislative Review and Liaison:* The Administrative Services Office is responsible for maintaining close liaison with Hawaii's Congressional delegation, the Legislature, and also the administration of all legislation affecting departmental programs. The office prepares correspondence

and testimony concerning various legislative proposals.

### Personnel Administration

The state personnel management staff is responsible for the administration of the state employee personnel program including recruitment and placement, classification, salary, leave, employee performance, employee relations, out- and in-service training, and personnel records maintenance.

There were 133 permanent state positions authorized during the year, of which 129 were filled by June 30, 1983. Additionally, twelve temporary positions were authorized and filled as of that date.

During the fiscal year, the following types and number of personnel actions were taken:

Type of Action	Number Processed
Appointments .....	74
Separations .....	63
Reassignments .....	3
Promotions .....	7
Retirements .....	5
Deaths .....	1
Reallocations .....	4
Demotions .....	1
Miscellaneous Changes .....	231

With regard to performance ratings, 37 individuals received very satisfactory ratings representing 28 percent of the state work force. From these, two sustained superior performance awards were submitted and approved during the fiscal year. The average monetary award amounted to \$200.

The 1983 recipient of the Adjutant General's Award for Distinguished State Service was Mrs. Emmaline M. English, an Office Manager II on the island of Kauai.

## Occupational Safety and Health

The Administrative Services Office, through its fiscal staff, administered the state occupational safety and health program to include the workers' compensation claims program. During the fiscal year, there were 23 reportable cases of work-related injuries involving state employees with a total of 161 lost workdays, or an average of 7 workdays per injury. This was a decrease in lost workdays of approximately 18.7 percent over the previous fiscal year. Additionally, there were 21 other workers' compensation injuries involving part-time National Guard personnel. The total compensation payment for the year amounted to \$64,444. This represents a decrease of \$6,242 or 8.8 percent less than the previous year's claims payments.

## Financial Administration

The Administrative Services Office administered \$6,026,080 in state general fund allocation and \$884,093 in federal fund appropriated receipts during fiscal year 1983. Included in the general fund allocation was a specific appropriation for major disasters amounting to \$2,250,000. Excluding the major disaster fund appropriation and general fund restriction of \$73,403, the operating fund allocation amounted to \$4,586,770. Of this amount, a total of \$4,585,353 or 99.97 percent was expended or encumbered leaving a lapsing balance of \$1,417. The expenditure and encumbrance from the major disaster appropriation amounted to \$992,816 or 44.1 percent leaving a lapsing balance of \$1,257,284. Table 6 in the Appendix depicts the distribution of general fund appropriation, appropriated receipts, and expenditures by program organizations and cost elements.

Additionally, the Administrative Services Office administered three federal fund holding and disbursement accounts and six general obligation bond fund accounts. Tables 7 and 8 reflect the status of these accounts as of June 30, 1982.

The department's cash receipts for the year amounted to \$1,204,165. Of this amount, \$18,550 was credited to the state general fund; \$68,972 to the general fund operating accounts; and \$1,116,643 to the special fund operating accounts. The sources and the fund accounts to which they were credited are depicted in Table 9 in the Appendix.

In administering the state finances for the year, the fiscal staff processed 3,707 purchase orders, 430 summary warrant vouchers, 130 bills for collection, 60 federal fund claims invoices and 60 treasury

deposit slips. The fiscal staff continued to maintain an outstanding record of prompt vendor payments with no payments over four weeks old and average processing time of less than ten working days following receipt of goods or invoices.

## State Administered Federal Funds

Federal funds for civil defense program activities amounting to \$586,360 were received as 50-50 matching fund grants under the Federal Emergency Management Assistance Program (Public Law 85-606) and Civil Defense Equipment Program (Public Law 920); and as 100 percent Federal funded contract grants for radiological maintenance and calibration, civil preparedness instruction, disaster preparedness planning, nuclear civil protection planning; earthquake hazards study; and radiological defense planning.

Federal funds for the Hawaii Army and Air National Guard amounting to \$529,566 were received under five separate cost reimbursable operations and maintenance service contracts negotiated between the National Guard Bureau and the State Department of Defense. These contracts provided for reimbursement of 100 percent, 80 percent and 75 percent of the authorized costs to operate and maintain building and grounds occupied by the federally supported activities of the Hawaii National Guard. Funds received under these contracts are deposited into the state treasury as appropriated receipts or as refunds of fringe benefit payments advanced by other state agencies.

## Property Administration

The Administrative Services Office provides centralized control

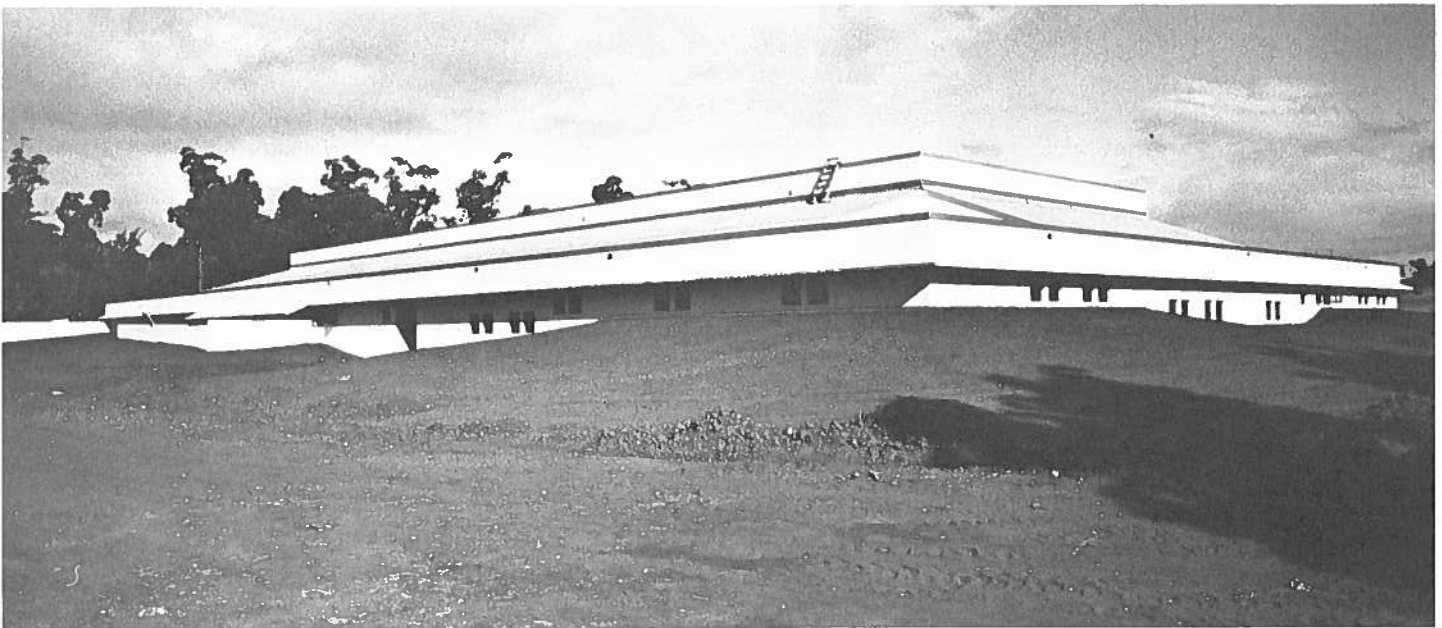

and accounting of all state property assigned or issued to the department. The department's property inventory as of June 30, 1983, is provided below:

Property Classification	Unit or Acres	Acquisition Cost
Land and Interest in Land .....	954.37	\$ 123,686
Buildings and Structures .....	37	7,873,655
Motor Vehicles .....	29	155,764
Equipment .....	3,030	2,086,326

During the year, the department acquired 195 line items of equipment valued at \$113,604 and disposed of 77 line items of surplus or unserviceable property valued at \$35,890.

The Administrative Services Office also administered the short term use and/or rental of department's facilities by coordinating, processing, and approving 50 separate applications

for use of armories and grounds located throughout the five major islands. The rental fees or utility reimbursements collected amounted to \$36,298.

## Engineering

### Mission

This office provides engineering services to the department's three divisions. The engineering services are in the following significant functional areas: major and minor construction program, facility repair and maintenance program,

real property management, fire prevention and protection program, grounds maintenance and custodial services.

### Organization

A staff of 47 support five major staff sections: office services,

contracts and engineering services, repair and maintenance, and Army National Guard and Air National Guard engineering services.

## Major Construction (On-going)

<b>Hawaii Army National Guard</b> 300-Person Armory, Wheeler AFB, HI (Construction) . . . . .	\$1,880,000
<b>Hawaii Air National Guard</b> Kahului Communica- tions Center, Maui (Construction) . . . . .	\$2,371,269
<b>Hawaii Region Operations</b> Control Center, Wheeler AFB, HI (Construction) . . . . .	\$3,500,000
<b>State Civil Defense</b> Replacement and Repair, Disaster Warning Sirens for Kauai . . . . .	\$ 140,494
Radio Controlled Siren Warning System, Statewide . . . . .	\$ 92,524

## Minor Construction

Minor construction projects include all projects for minor new construction or major repair,

maintenance or modification of facilities. This program may be supported by federal funds, state funds or jointly with federal-state matching funds. A total of \$21,352 was expended - \$8,467 federal and \$12,885 state - during Fiscal Year 1983 for 15 significant projects under the minor construction program. See Table 10 for complete listing of significant projects.

## Repair and Maintenance

Recurring minor maintenance, repairs and modifications of facilities are accomplished by in-house maintenance personnel on a time-and-materials basis or by formal and informal construction contracts. This program may be supported by federal, state or joint federal - state matching funds through separate Army and Air National Guard Service Contracts or Army National Guard Training Site Contracts. The federal

contracts under the Service and Training Site contracts for federal Fiscal Year 1983 were:

Air National Guard Service Contract (Hickam) . . . . .	\$788,240
Air National Guard Service Contract (Barking Sands & Keaukaha Military Reservation) . . . . .	\$179,081
Army National Guard Service Contract . . . . .	\$660,500
Army National Guard Training Site Contract . . . . .	\$359,100

A total of \$705,533 was expended - \$474,802 federal and \$230,731 state, during Fiscal Year 1983 for 33 significant projects under the repair and maintenance category. See Table 11 for complete listing of these projects.

## Public Affairs

### Mission

The Public Affairs Office plans, develops, directs and administers the department's community relations, public and internal information programs.

### Organization

Consisting of a public affairs and education officer, information specialist and a clerk-typist, the Public Affairs Office coordinates and works closely with public affairs officers from the department's major units and active military services to carry out its mission.

### Activities

The primary function of the Public Affairs Office is to advise the Adjutant General, staff members and divisions on matters

relating to public affairs that affect the department.

In the performance of its public information program, the office prepares and distributes news releases, photographs and videotapes on departmental activities to both civilian and military news media locally and on the mainland. The Public Affairs Office also responds to queries from the news media, public and other state and federal agencies. Additionally, the office also prepares speeches and reports for the Adjutant General and Governor.

In support of the department's internal information program, the Public Affairs office consolidates, edits and publishes the department's annual report and quarterly newspaper, PUPUKAHI.

The newspaper is distributed to all current members of the Hawaii National Guard, departmental employees, other state and federal agencies, retired guardsmen and other individuals interested in the department's activities.

Annually, the Public Affairs Office support numerous community relations activities sponsored by the department and its units for the local communities, working closely with other state agencies and military services to publicize the events and the public's awareness of the department.

# Support Personnel Management Office

## Mission

The Support Personnel Management Office provides centralized civilian personnel administration for all assigned federal technicians (both Army and Air) and administers the Active Duty Guard/Reserve program. The office furnishes the Adjutant General, his staff, managers, and supervisors with technical assistance on employee services, personnel and position management, labor relations, training, and equal employment opportunity matters.

## Organization

The personnel office consists of four functional entities: the Personnel Management Section, Employee Services Section, Military Duty Management/Services Section, and Equal Employment Opportunity Section.

## Personnel Management Section

This organizational element oversees manning control, position management, and position classification. It is responsible for developing plans and executing programs in the areas of staffing, placement, and merit promotion. Other major program areas are: adverse actions, grievances, labor-management relations, training, and military/technician compatibility, as well as performance appraisals and incentive awards. Interpretation of regulations and publications development are also primary functions.

## Employee Services Section

Key responsibilities for this section are: employee orientation, processing personnel actions, records maintenance, and technician personnel management information system reporting. Essential services such as providing information on employee benefits,

pay administration, merit pay management, and retirement counseling and processing require continuous personal contact with members of the full-time work force on a routine basis.

## Military Duty Management/Services Section

This section supports the Active Duty Guard/Reserve program by recruitment, appointment and in-processing, providing information on benefits and entitlements, manning control, reports accountability, and advisory services to management. The Active Duty Guard/Reserve program has expanded steadily since its inception and is expected to increase significantly more through this decade.

## Equal Employment Opportunity Section

The Equal Employment Opportunity Manager formulates and administers plans and programs for all employees regarding equal opportunity, affirmative action, discrimination investigations, and equal opportunity training. Eight part-time counselors, assigned throughout the department, provide an informal mechanism to assist in resolving equal opportunity complaints and problems. Additionally, a part-time Federal Women's Program Manager and an assistant advise and assist on the extension of employment and promotion opportunities for women. They are the point of contact and liaison for activities specifically intended for women.

## Activities

The department's Federal technician and Active Duty Guard/Reserve assigned strengths for the Army and Air National Guard at the beginning and end of the fiscal year were:

	July 1, 1982	June 30, 1983
<b>Army technicians</b>	262	284
<b>Air technicians</b>	521	520
<b>Active Duty Guard/Reserve (Army)</b>		135
<b>Active Duty Guard/Reserve (Air)</b>		<u>49</u>
<b>Total</b>	<b>783</b>	<b>988</b>

A wage rate schedule increase affecting 132 Army National Guard technicians and 258 Air National Guard technicians took effect on August 8, 1982. General Schedule technicians also received an increase in October 1982 that applied to 128 Army National Guard technicians and 244 Air National Guard technicians. A 2.5 percent cost-of-living allowance increase was effected in September 1982 for Maui, Molokai and Oahu bringing the total to 20 percent. The allowances remained unchanged for Hawaii at 10 percent and Kauai at 17.5 percent.

The National Guard's Professional Education Center in North Little Rock, Arkansas, provides an ever-expanding curriculum to meet the training needs of National Guard personnel. During the past year, 59 Hawaii Army and Air National Guard personnel attended courses at the Professional Education Center.

The Office of Personnel Management, Western Regional Training Center, and other interagency training offices provided managerial, supervisory and worker-level courses of instructions. Forty-five Army and 54 Air National Guard technicians attended these courses. In addition, 26 Army National Guard technicians attended an Occupational Safety and Health

## Support Personnel Management Office

Act Compliance Management Course conducted by National Guard Bureau personnel.

An estimated \$71,346 in federal dollars was expended to support the training of federal technicians.

Negotiations for new collective bargaining agreements for nonsupervisory Army and Air National Guard technicians will begin in fiscal year 1984.

A Department of Defense retirement and service awards

luncheon was held in July 1982 to honor and recognize the department's retirees and length-of-service awardees.

In accordance with Federal regulations, a personnel management evaluation team from the National Guard Bureau, Office of Technician Personnel, conducted a review of technician personnel management in the Hawaii National Guard from June 27-July 1, 1983. The evaluation

focused on various areas of personnel management, including military/technician compatibility, position management and classification, and the operation of the Support Personnel Management Office.

The following table reflects incentive awards and personnel actions during the year.

	Number Submitted	Number Approved	
<b>Incentive Awards</b>			
Suggestion Awards:			
Army technicians .....	3	2	
Air technicians .....	8	3	
Sustained Superior Performance Awards:
