

Army developments. . . 16

The 29th Brigade is now checking out another piece of new equipment, the monster **M728 Combat Engineer Vehicle**. It has a boom and winch which can lift 17,500 pounds and a 165mm demolition cannon. The M728 can blow up fortifications and lift debris from its path. It practically vaporized a five-ton truck in a firing exhibition at Schofield.

The 29th also has received an **Armored Vehicle Launched Bridge**, a bridge on tracks. Troops of the 29th meanwhile continue to check out 10 **M551 Sheridan** "tanks."
